 - o Skilled Trades

YOUR

Community Approach

Through collaboration of local organizations, the workforce initiative is able to provide information, assistance, and action through numerous channels. This creates a unified effort on behalf of the community and provides our citizens, businesses, and future community members with the most efficient and effective services available in the area.

garden city

Finney County is a progressive community on the plains with a booming local economy. People in our community have come to love the shopping and dining experiences that you would previously only find in larger cities. The growth of the community is also reflected in our 160 acre high school, which includes four academies of study, and our ever-expanding Garden City Community College, which offers associate's through master's degree programs. Our regional hospital is home to the state of the art Heartland Cancer Center, the most advanced cancer treatment facility in the state of Kansas. In Finney County you can truly have it all--a small town community that values family and friends-- which is the perfect pace to start and raise a family, with all the amenities of a larger city!
